

Walking Tour of The New National Ready - Mix Batch Plant Located in Los Angeles

Tuesday, June 22, 2021 – 12:00pm

Join the ACI SoCal Chapter for a walking tour of the new National Ready-Mix batch plant located in downtown Los Angeles.

The plant is a state-of-the-art facility featuring twin alleys for transit mixed operations built for 400-plus yards/hour output. It has extensive material storage and transfer capability with 1,100 tons of cement stored in two, five-compartment silos and 5,000 tons of aggregate in three conveyor and tunnel feed bins. as well, sand and gravel can be unloaded into three "grizzlies" belted at up to 750 tons/hour along 12 conveyors.

The guided tour will include a walk-through working facilities, batching and dispatch offices hosted by Gus Rios, Plant Manager. Please sign up early as space is limited.
